

ClickHear™ and ClickHear MOBILE™

ClickHear™ and ClickHear MOBILE™

A Voice for the Web

ClickHear™ and ClickHear MOBILE™: The newest talking tool for the Internet by gh, LLC!

ClickHear™ products provide a voice for the web instantly through your web browser. Reading or visual difficulties no longer get in the way of accessing websites!

ClickHear and ClickHear MOBILE enable text to be read aloud at the reading comfort of the user, in any language. Both versions of ClickHear are a great benefit to users who are low vision, auditory learners or are overcome with language barriers.

Speech rates can be adjusted for your reading and comprehension needs. Color customization options make following along with the text even easier.

The Click Navigation feature allows you to skip around the page and only read portions of the text you select. The configuration settings are saved per user, which reduces the time needed to begin reading web pages.

Standard Features:

- Enables text to be **read aloud** at the reading comfort of the user
- Choose from 3 **high quality** Nuance voices
- Variable text and **highlighting** color options
- **Translates** to several different languages: Spanish, French and German
- Configuration settings saved per user
- **Click to hear** any part of the web
- Play/Pause, Previous, and Next playback
- Set volume and speech rate to your needs

ClickHear™ and ClickHear MOBILE™

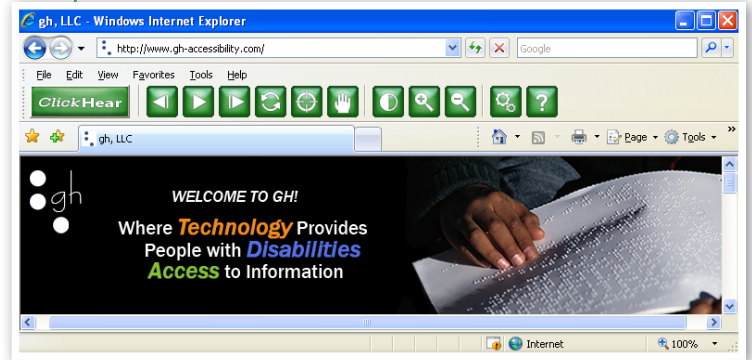

ClickHear™

ClickHear is a toolbar that operates in many web browsers. You start by downloading and then installing ClickHear on your computer. After installation, the ClickHear toolbar will appear at the top of the browser. Simply start reading at the top of the page or choose a section to begin reading. Navigate through the page with a **click** of the **mouse**. ClickHear reads not only general text on a web page, but also text fields, buttons, and even alt text for images.

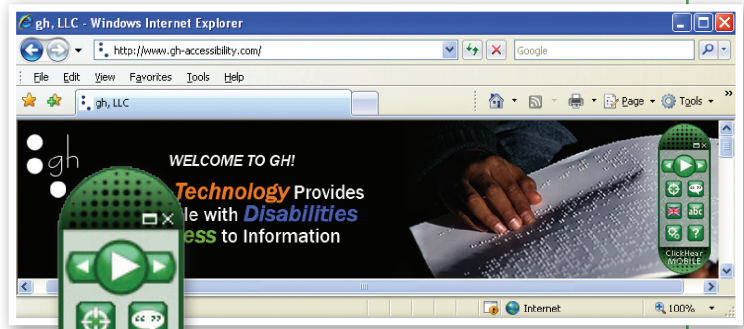

Customization options allow you to change the appearance of the text and contrast, directly zoom-in or out on the page with panning availability, and also choose the cursor and toolbar size. Three high quality Nuance voices are included.

Customize your Mobile

ClickHear MOBILE can **translate** and **read** entire web pages in a variety of different languages right before your very eyes!

A variety of different themes are available for a customized look and feel as well! ClickHear MOBILE works with Internet Explorer 6 and above, Firefox 3, Safari 4, and Google Chrome for Windows, Macintosh, and Linux platforms.

ClickHear MOBILE™

ClickHear MOBILE provides the same features as ClickHear but also allows instant reading access to any webpage since no installation is required. You can use ClickHear MOBILE anyplace – from the home, office, library, or on any computer with Internet access and a web browser. “Speak selection” and “spell” options provide for a controlled learning and reading experience. With your ClickHear MOBILE subscription you will receive a login and password. That’s all you need to have ClickHear MOBILE available at your fingertips world-wide! Subscriptions are available for either a single user or a domain license.
